Relevant Experience

Platu Pro : Inventory Management App for Restaurant, *Self-Directed Project* ⧉
- Developed a custom inventory management app in React Native, tailored for Platu Miami, the restaurant I worked at as a server.
- Enabled servers to report and request low-stock supplies, triggering real-time notifications to the manager for faster response.
- Designed a manager dashboard that lets the manager view requests sorted by supplier and urgency, making prioritizing items to restock easier and more efficient.

Projects

Portfolio Website, *Web application : JavaScript, React, TypeScript* ⧉
- Developed a visually appealing and mobile-friendly portfolio with seamless user experience across devices.
- Created a clean, organized layout to highlight skills, projects, and achievements effectively.

Gamehub, *Web Application: JavaScript, React, TypeScript* ⧉
• Developed a RAWG.io clone focused on video game discovery.
• Implemented a responsive layout with Chakra UI for a modern, user-friendly interface.
• Integrated server-side data fetching for dynamic display of video game information.
• Enabled advanced filtering options to allow users to sort and organize games by genre, platform, and other preferences.

ResumeUp, *Desktop Application : Java* ⧉
- Created an application to simplify the process of creating resume for beginners, using Object-Oriented Programming principles.
- Designed interactive UIs with JOptionPane and enabled PDF generation using the iText library.

Skills

Programming Languages   **Web Development**
 Java, JavaScript, TypeScript   HTML, CSS, React

Mobile Development
React Native
