## 🧠 Skills

**Web Development** – HTML | CSS | React | TypeScript

**Programming Languages** – Java | JavaScript | Python | SQL

**Other Skills** – Object-Oriented Programming | Database Management

## 📂 Projects

**Game Hub** ⧉
*Web Application: Javascript, React, Typescript*
- Developed a RAWG.io clone focused on video game discovery.
- Implemented a responsive layout with Chakra UI for a modern, user-friendly interface.
- Integrated server-side data fetching for dynamic display of video game information.
- Enabled advanced filtering options to allow users to sort and organize games by genre, platform, and other preferences.

**Etch-A-Sketch** ⧉
*Web Application:  Javascript, CSS, HTML*
- Designed and implemented an interactive Etch-A-Sketch, featuring intuitive drawing and customizable grid sizes.
- Employed DOM manipulation with JavaScript for real-time drawing capabilities and responsive design elements.

**ResumeUp** ⧉
*Desktop Application: Java*
- Developed an intuitive application that simplifies the resume creation process for beginners.
- Applied Object-Oriented Programming principles for structured code organization, utilized JOptionPane for interactive UI, and used iText library for PDF generation.

## 🎓 Education

**Bachelor in Computer Science**                                     08/2021 – 05/2024
*Florida International University*                                        Miami, FL, USA
Scholarship : Florida's Bright Future

Relevant Courses: Data Structures, Software Engineering, Database Management System
